Glossary

1. Introduction

1.1 Purpose

The glossary contains the working definitions for the KAPP project. This glossary will be updated throughout the life of this project.

1.2 Scope

This glossary addresses all the terms which have specific meanings for this project. Actors not included in the glossary will be described more in the use case definitions.

1.3 References

Course Website: <https://people.eecs.ku.edu/~saiedian/Teaching/448/>

2. Definitions

2.1 API

2.1.1 Application programming interface: a software system that allows two applications to interact with one another.

2.2 CSS

2.2.1 Cascading style sheets: programming language used to describe how HTML elements should be described

2.3 HTML

2.3.1 HyperText markup language: a language that describes how different elements should be displayed in a browser window.

2.4 JSON

2.4.1 JavaScript Object Notation: a data-interchange format that is used to represent data based on JS objects
